suitable for ordinary shoes

type ES 300 • Order No: 43.720.05

# CANMAT

- **CANMAT – mobile ESD shoe dispenser, contact-less**
- **Dispenser for ESD disposable overshoes**
- **Suitable for visitors of ESD protected areas and clean rooms**

- automatical covering with disposable overshoes
- easy handling-CANMAT can be positioned at any place (without screw connection resp. installation)
- suitable for any walking shoe
- CANMAT keeps production facilities and clean rooms free from dirt particles
- mobile

The new mobile CANMAT ESD shoe dispenser was especially developed for visitors of ESD protected areas and clean rooms. There's no more troublesome bending down and fitting in the entry area – long waiting periods of visitor groups can be avoided.

CANMAT can be placed fast and easy, everywhere.

A person with commonly used walking shoes puts one feet at a time into the device and extrudes the pedal as far as possible, in doing so the overshoe will be fitted on - contact-less. With the ESD disposable overshoes the derivating ribbon must be placed in the shoe by hand (this isn't necessary, when using ordinary, non ESD-appropriate standard overshoes).

### Order No: Description

80.980.00 CANMAT shoe dispenser (without overshoes)

80.980.50 standard disposable overshoes, yellow (non dissipative)

80.980.60 ESD disposable overshoes, yellow with derivating ribbon(dissipative)
