New Product: Multifunction Electric Screwdriver Delvo models DLV30S / 45S / 70S -AY series

We are pleased to inform you that the multifunction electric driver with various new functions including automatic speed control function; models DLV30S/45S/70S will soon be released.

The main features of the new electric screwdrivers are as follows:

[Features]

1. Improves efficiency and quality of screw fastening work

① Starts fastening at low speed ② Speeds up at the screw shaft part ③ Returns to low speed again at the end of fastening.

Automatic 3 step speed control ideal for screw fastening improves production efficiency by reducing poor screw fastening (ex. thread lifting due to mating failure, screw head or neck breakage, over-fastening, etc.).

2. Meets various fastening conditions

Since 9 stages of speed setting is available, it can deal with various fastening conditions. In addition, the 6 series lineup of different torque and speed responds to a wide range of needs.

3. Contributes to the optimization of the whole work with various functions

Various functions such as screw fastening counter function and auto reverse function are equipped. By the use of multiple units, the whole work can be unified in a high level condition. The remote controller that can set these functions to multiple screwdrivers simultaneously is also available as an option.

They will be available from the middle of June.

For further information of the models, please see our leaflet No.Dk318. Your immediate introduction into your market would be highly appreciated to generate further sales of our “Delvo” screwdrivers.
