**Weller®**

The WDD 161V rework station is a dual output unit supplied with soldering and desoldering tools. It features a micro processor controlled system which allows independent temperature control of both tools. The station will automatically recognize the tool in use and calibrate itself for that tool. Vacuum for the desoldering tool is generated by an internal venturi driven from an external compressed air source.

The selected operating temperatures are displayed on a digital display switchable between tools. By use of the WCB 2 control box, additional functions can be pro-

grammed into the base unit such as, temperature lock, set back time, temperature offset, deg C/deg F, factory setting reset.

# Weller Multi-Functional, Digital Desoldering Station WDD 81V

The Weller WDD 81V Desoldering station features digital process control for exact temperature set. The in-built microprocessor circuitry automatically recognizes all Weller soldering irons and provides the optimal settings of the connected tool. The station comes with the DSX 80 Desoldering iron. A range of desoldering suction triplets enables solder to be removed from a wide variety of solder joints. The Weller CSF rework heads can also be

interchanged to provide total flexibility in the rework of most Flat Packs. An internal maintenance-free compressed air converter provides the vacuum for the desoldering iron. The WDD 81V requires a compressed air supply.

The Weller WCB 2 Calibration unit can be connected to the WDD 81V to further enhance programme setting or for PC interface.

## Additional Safety Rests

### Safety rests with Stop+Go Function

The safety rests with Stop+Go function have an integrated micro switch which is activated when the soldering iron is picked up or put down. The operator can decide between an immediate or delayed (20 min) temperature reduction (SETBACK) to 150°C (300°F) and programme the power unit accordingly. The SETBACK time can be changed with the optional calibration box WCB 2. The temperature reduction extends the lifetime of the tips.

All Weller digital soldering stations and the WAD 101 hot air station automatically recognize the Stop+Go safety rests.
